PROFESSIONAL SUMMARY

Results-driven Computer Engineering student and MERN stack developer with hands-on experience in building scalable, full-stack web applications. Demonstrated problem-solving mindset with a strong focus on optimizing application performance and delivering seamless user experiences. Passionate about leveraging modern technologies to architect robust web solutions and drive continuous innovation.

EDUCATION

B.E. in Computer Engineering
LDRP Institute of Technology and Research

2022 – 2026
CPI: 7.68

SKILLS

Programming Languages: JavaScript, C, C++, Python
Frontend: React.js, Redux, Tailwind CSS, Next.js, Tanstack
Backend: Node.js, Express.js
Database: MongoDB, MySQL
Tools: Git, GitHub, VS Code, Postman

EXPERIENCE

MERN Stack Developer Intern

Demaze Technology

- Designed and developed responsive, dynamic user interfaces using React.js
- Improved overall user experience and frontend application performance
- Collaborated with team members to build and implement scalable frontend features

MERN Stack Developer Intern

Brainy Beam (1 Month)

- Developed full-stack web applications utilizing the robust MERN stack
- Built RESTful APIs to seamlessly integrate frontend components with backend systems
- Enhanced application performance, security, and usability through efficient engineering practices

PROJECTS

Remote Team Productivity & Time Tracker | *React.js, Node, Express, MongoDB*

GitHub

- Built a comprehensive full-stack productivity tracking system to streamline remote team workflows
- Implemented secure JWT authentication and role-based access control for effective data management
- Created interactive dashboard interfaces featuring intuitive task tracking and dynamic status filtering
- Designed scalable RESTful APIs for efficient querying and management of project tasks and user data

ZenCart E-Commerce | *React.js, TypeScript, Node.js, Express.js, MongoDB*

GitHub

- Developed a comprehensive e-commerce platform using React, TypeScript, Node.js, Express, and MongoDB, featuring robust role-based authentication for Admin and User workflows
- Implemented advanced product search with debouncing, multi-criteria filtering, pagination, and dynamic category-based navigation
- Built critical e-commerce features including guest and authenticated user carts, wishlists, order lifecycle management, and secure Razorpay payment integration
- Designed a feature-rich admin dashboard for managing products, orders, and reviews, significantly optimizing frontend performance via TanStack Query and efficient REST API architecture

Blood Bank Management System | *HTML, CSS, Python, SQLite*

GitHub Link

- Built a streamlined system facilitating efficient donor and requester management workflows
- Enabled reliable blood inventory tracking algorithms and secure user registration processes
- Designed an intuitive, user-friendly interface ensuring smooth and accessible user interactions

ADDITIONAL INFORMATION

Interests: Sports, Exploring new technologies
